Programming: Java · Javascript · PHP · C# · Android · Unity · Kafka · Spring Webflux · Typescript · Quarkus · Kotlin

CI/CD - DevOps: Github Actions · Gitlab CI · Kubernetes · GCP · AWS · Amplify · Openshift · Terraform · Docker · Datadog · ArgoCD · Dokploy

Database: PostgreSQL · MySQL · Oracle · MongoDB · IPFS

Ontology: RDF · OWL · SHACL · SPARQL · ODRL · Linkml · JSON-LD

Work Experience

Gaia-X European Association for Data and Cloud AISBL — Brussels, BE

Gaia-X — 05/2023 - Present

Gaia-X is a European initiative launched to create a trusted and sovereign data and cloud ecosystem by defining rules, standards for how services should operate. Gaia-X promotes interoperability, helps reduce dependency on a single vendor and avoids lock-in as well as being closely aligned with European regulations such as GDPR to strengthen Europe's digital sovereignty and trust in cloud and data services.

- Tech Lead within the CTO Team
- Working on decentralized software components deployed by several providers
- Contributions to Standards from W3C and Eclipse Foundation
- Create the architecture for all new software components
- Managing Kubernetes Clusters and Gitlab CI
- Project Management (Tasks, Roadmap, Planning)
- Contribution to an e-learning platform
- Speaking and representing the association on multiple events and conferences
- Organizing workshops, hackatons and events all over Europe
- **Technical stack:** Typescript - Kotlin - NestJS - React - Quarkus - Python - Gitlab CI - Kubernetes - Helm - IPFS - SPARQL - OWL - GraphDB

Tempo Checkout Delivery — Ronchin, FR

ADEO — 12/2022 - 04/2023

Working as a feature team for the delivery step on the checkout funnel of Leroy Merlin site for multiple business units and a complete stack (front to back) which includes the front of the delivery page and multiple APIs in charge of managing several business rules related to delivery and shipping

- Lead developer on the frontend.
- Set up CI/CD pipelines using Github Actions.
- Automated monitoring (SLO, alerting) using Terraform and Datadog.
- **Technical stack:** Spring Webflux - Java - Vue.js - GraphQL - Github Actions - GKE - Storybook - Terraform - PostgreSQL - Kafka - MongoDB

Tempo Selling front — Villeneuve-d'Ascq, FR

ADEO — 02/2020 - 12/2022

Creation of an international marketplace platform for multiple Leroy Merlin sites (France, Spain, Italy and Portugal) and in particular the front of the checkout funnel (Cart, Delivery, Payment) as well as an omnichannel checkout funnel for in-store sales people. Additionnally, adding a micro front fragment for mini cart in the header of the site and an API for add to cart operations.

- Made multiple contributions to the ADEO Design System.
- Proposed business solutions for multiple features.
- Improved the accessibility of the application.
- Created a frontend component library.
- Developed an omnichannel checkout funnel.
- **Technical stack:** Java, VueJs, Micro Frontend, Freemarker, GraphQL, Github Actions, GKE, Storybook, Terraform, Design System, Storyshot, Google Analytics.

Work Experience

Log'Inventaire
Lezennes, FR

LeroyMerlin
01/2019 - 01/2020

Application for annual inventory management for LeroyMerlin stores using the storage management system used in-store. The application is also used for monitoring and dashboarding of all the data related to the inventory by the store managers and the audit team.

- Working on site during inventories to ensure the availability of the application.
- Direct contact with business managers and final users.
- Designing the front-end interface.
- Business and technical adaptation for a Poland launch.
- **Technical stack:** Spring Webflux - Angular 8 - Spring Batch - PostgreSQL - Gitlab - Jenkins - Gitlab CI - Docker - OpenShift - Kafka
